A foundation built on integrity!

10-Point Basement Inspection Checklist for Homeowners

First, get a flashlight, notebook and pen and look closely at all of your basement walls and floors.

Interior Inspection

- Wall or floor cracks
- Seepage at the cove (where the floor meets the wall) or seepage through floor cracks
- Wet walls
- Wall/floor stains
- Unlevel floors
- Mold/mildew or musty odors
- White chalky substance (efflorescence) on the walls

Exterior Inspection

- Clean gutters
- Properly extended downspouts
- Proper grading

Keep your notes and this checklist and share them with your estimator.

Our experienced and trained professionals will use the latest technology to evaluate your foundation and waterproofing problems.

- Laser level
- Moisture meter
- Relative humidity meter

Water Seepage

Our experience with Accurate Basement has been wonderful. Our estimator was extremely professional and explained everything very thoroughly. I never once felt like I was being sold something I didn't need. I appreciated the honesty when talking about our basement situation. I highly recommend them.

Kelly M, Sussex

I had concerns about water leaking in my basement and the related drain tile system. My estimator took time to walk me through some options on what I could do myself to reduce the water in the basement. Great ideas and no cost for his advice. He truly cared and took the time to explain, all for no cost.

Guy D, Milwaukee

Our estimator gave an explanation of everything and took the time to answer my questions. When they did the drain test they were neat and again explained everything! The quote was in the same range as the others I got. Very pleased so far! Definitely going with Accurate!

Janice H, Germantown

Highly recommend using Accurate Basement Repair. We had drain tile replaced, basement walls reinforced and had a sump pump installed. All work was completed under a tight closing deadline as requested by our home buyer. They went above and beyond to accomplish all the work in a short amount of time. Quality of work was excellent and work site was spotless when they were done working.

Shawn H, Milwaukee

Great experience! We called thinking that we potentially had a major issue with our foundation due to a small but persistent water leak. An estimator came out to evaluate, and advised us to change our landscaping on the affected wall instead. We completed the small project - only took us a few hours over the weekend. When the next rain came, our basement was dry! What we feared would be at least a few thousand dollars came out to just a couple hundred. Thanks for your honesty and advice! We appreciate it.

Erin B, Milwaukee

Thank you! Your crew was excellent. They were professional, efficient, and polite. They did a great job cleaning up. When I had a question, you were quick to respond and provide a complete, easy to understand explanation and I feel your price was very fair. I was nervous about this type of repair, but you did only what was necessary. As a landlord, I encounter and work with contractors often. Thank you for being ethical and providing great quality and service!
